SUBJECT INDEX

Acetylation H^3 radioautographs 598
Acetylcholinesterase fine structure in muscle 317
in sympathetic ganglia 618
N-Acetylglucosaminidase 105, 242
Acid dye reaction with corneal stroma 380
Acid phosphatases, electrophoresis 542
liver, chromatography 564
lysosomes and Golgi 630
neural tissue culture 635
rat liver, heterogeneity 630
Acid reaction with aromatic diamine 368
Acridine orange, cell cultures 22
Acrolein Schiff protein stain 234
Adenosinetriphosphatase in cytoplasms 625
and formol Ca 434
mitochondrial 625, 626
pancreatic cells 628
Adrenaline, noradrenaline photometry 59
Adrenal medulla, cytophotometry 59
Adrenal phosphorylase and ACTH 622
Adsorption of formazans 604
Aldehyde reaction, aromatic amine 600
aromatic diamine 368
Alizarin red S for Ca^{++} in starch gel electrophoresis 631
Alkaline phosphatase, anion inhibition 631
phosphatases, electrophoresis 631
Aminopeptidase in granulating wound 607
identity and leucyl-β-naphthylamide 609
Aminopeptidase, new substrates and diazo's 349, 607
by oxidation technic 712
Aminopeptidases, renal, inhibitors 608

Amylo-1,6-transglucosidase, oral mucosa 690
Androgen effect on renal β-glucuronidase 633
Announcements 1, 109, 348, 729, 730
Anthrone, micro method for glycogen 670
Antibody localization, Echo technic 596
Aortic histochemistry on fatty acid free diet 627
Arginine, new Sakaguchi method 477
Aromatic diamine reaction of acid and aldehyde 368
Auramine O Schiff reagent 599
Autoradiography, see Radioautography
Azo dye methods, brain enzyme histochemistry 171
Azure A-salt ribonucleic acid stain 619
Basic dye uptake by corneal stroma 380
Benzidine peroxidase in muscle 206
Bone, birefringence and toluidine blue 636
Bone, demonstration of zinc 141
Bone, tetracycline fluorescence 261
Books Received 108, 210, 461
Book Reviews
Pantin: *Microscopical Technique for Zoologists* 107
Hayhoe: *Leukemia. Research and Clinical Practice* 107
McManus and Mowry: *Staining Methods. Histologic and Histochemical* 209
Pease: *Histological Techniques for Electron Microscopy* 210
Lison: *Histochimie et Cytochimie Animales* 3rd ed. 461
Koss and Durfee: *Diagnostic Cytology and its Histopathologic Bases* 587
Brain dye uptake, in excitation 103
esterase electrophoresis 656
5-nucleotidase, Mn^{++} and pH 455
Branching enzyme in oral mucosa 690
Calcification by various methods 30
Ca^{++} binding of metachromatic chondroitin compounds 673
Calcium, chloranilic acid test 154, 415
Ca^{++} and oxidase activity 602
Carbon tetrachloride (C^{14}) lesions 613
Cartilage, chemistry and histochemistry 611
epiphyseal, histochemistry 73
interferometry 611
Cathepsin of peripheral nerves 473
Chick embryo, liver, phosphorylase 454
phosphorylase, location 386
Chitin, molluscan, histochemistry 87
Chloral formol, free cell fixation 424
Chloranilic acid reaction for Ca^{++} 154, 415
Cholesterol and other sterols 2
$HClO_4$-α-naphthoquinone method 615
Cholinesterase in cultured muscle 66
muscle, fine structure 317
thiolacetic method 325
Chondroitinases, flavobacterial 610
Chondroitin metachromatic compounds, Ca^{++} binding 673
Chromaffin reactions, quantitative 54
Chromatographic purification of fluorescein antibody 484
Chromatographic purification of reductases 605
Chromatography of liver acid phosphatases 564, 630
Chymotrypsin DFP-H^3 in mast cells 616
Coenzyme Q_7 in dehydrogenase systems 635
Colchicine, RNA synthesis, liver regeneration 615
Corneal stroma, acid and basic dye uptake 380
Cryostat improvements 208
Cultured neural tissue, lysosomes 635
Cytidine H^3 uptake, nucleoli and chromatin 621
Cytochrome oxidase skin 694
Cytochrome oxidase technic 59
Cytophotometry, adrenal medulla 54
deoxyribonucleic acid 251, 661
ribonucleic acid 97
of sperm and time 251
Cytoplasmic, extra mitochondrial ATPase 625
Deacetylchitin polysaccharide stain 612
Dehydration effect on toad kidney 126
Dehydrogenase TPN linked, EDTA 203
Deoxyribonuclease localization 647
Deoxyribonucleic acid photometry in leucocytes 620
Dextran, Inferon method 104
Diamine reactions of acid mucopolysaccharides 612
Diazonium salts for aminopeptidase method 607
Diazonium salts, enterochromaffin 11
Diazonium compounds for phosphatase method 301
Diisopropylfluorophosphate H^3, enzyme localization 616
Diphosphopyridine nucleotide diaphorase, Q_7 635
Distributional error, new approach 622
Disulfide and sulfhydryl by DDD 640
Dopa reaction, retinal pigment epithelium 457
Dry mass of hypophyseal cells 49
Echo technic for antigens 596
EDTA and TPN dehydrogenase system 203
Elastin, resorcin fuchsin stain mechanism 553
Electronmicrography
hepatic glucose-6-phosphatase 635
$InCl_3$ nuclear stain 620
iodo reagents 596
Electrophoresis
acid phosphatases 542, 630
brain esterases 656
Embedding, polyvinyl alcohol 634

Enterochromaffin
azo coupling reactions 11
metal chelate reaction 44
studies on structure 184
Enzymes
brain, azo methods 171
distribution intestinal epithelium 636
free cells, chloral formol 424
frozen substituted cells 204
gastroderm in *Hydra* 633
localization by Echo technic 596
by freeze substitution 600, 601
by H^3, DFP 616
renal proximal tubule 578
Epididymis, glucose-6-phosphatase 681
mouse, lactic dehydrogenase 221
pyrophosphatase and Golgi 418
thiamine pyrophosphatase 629
Esterases of brain, electrophoresis 656
Esterases, inhibitor sensitive and resistant 504
Esterases, thiolacetic acid 325
Excitation and dye uptake in brain 103
Feulgen cytophotometry, hypophysis 661
Feulgen cytophotometry, sperm 251
Fibrin by rosindole method 340
Fibroblasts, mucopolysaccharide synthesis 278
Fixation of Golgi apparatus 459
Fixation of tissue, NaCl influence 409
Fixative action on tissue lipids 572
Flavobacterial mucopolysaccharide enzymes 610
Fluorescein deacetylchitin for mucins 612
Fluorescence, metachromasia, acridine orange 22
nuclei by $InCl_3$, 8-quinolinol 620
tagged thyrotrophin localization 271
tetracycline in bone 261
Fluorescent antibody
chromatographic purification 484
for mucin demonstration 491
Fluorescent
Echo enzyme localization 596
Feulgen reaction 599
protein, renal resorption 356, 614
serum proteins, tissue distribution 356, 634
Fluorochrome proteins, preparation 458
Flying spot microscope, UV photometry of live cells 621
Formol-calcium, adenosinetriphophatase 434
effect on oxidative enzymes 603
Free cell enzymes, chloral formol 424
Free radical in indophenol blue synthesis 190
Freeze substitution, enzymes 204, 600, 601
Freeze substitution of sections 292
micro assay of sections 601
Frozen section mounting 363
Gastroderm, enzymes in *Hydra* 633
Gelatin silver for protease demonstration 469
Glia cell nucleic acids 619
Glucose-6-phosphatase epididymis 681
liver electronmicroscopy 631
β-Glucuronidase
androgen reactive in mouse kidney 633
in rat testis 615
topochemical localization 105
γ-Glutamyl transpeptidase localization 624
Glycogen, basis of histochemical detection 498
localization in muscle 38
micro anthrone method 670
synthesis, uridine diphosphate 304, 623
Golgi, acid phosphatase in lysosomes 630
cytochemical fixation of 459
epididymal pyrophosphatase 418
Hale method reaction of 610
material in retinal pigment epithelium 457
thiamine pyrophosphatase 629
Granulation tissue aminopeptidase 607
Hale method, Krecke's colloidal iron 609
Hale procedure and Golgi zone 610
Heart muscle isolate, indophenol blue synthesis 190
Hepatic acid phosphatases, chromatography 564
heterogeneity 630
Hepatic, see also liver, Kupffer
Histamine demonstration in mast cells 534
Hormones and uterine phosphorylase 430
Hurler's disease, histochemistry 79
Hydra, gastrodermal enzymes 633
Hypophysis cytology and dry mass 49
Hypophysis, Feulgen microspectrophotometry 661
Imbedding, polyvinyl alcohol 634
Imprint method, hypophyseal cytology 49
Indium trichloride nuclear stains 620
Indophenol blue synthesis 190, 197
Injected protein, tissue distribution 356
Inhibitor sensitive and resistant esterases 504
Insect succinic dehydrogenase 157
Interferometry of cartilage 611
Intestinal epithelium, enzymes 636
Iodo reagents, electronmicrography 596
Iron chelate of enterochromaffin 44
Isocitric dehydrogenase, mitochondrial 528
Kidney, androgen effect on β-glucuronidase 633
experimental pyelonephritis 632
Krecke's colloidal iron for Hale method 609
Kupffer cells, liver phosphatases 392
Lactic dehydrogenase DPN, epididymis 221
Lactic dehydrogenase, odontogenesis 117
Lactose-C^{14} in ileum epithelium 452
Lead acetate fixation 79
Leucine aminopeptidases, renal, technics 608
Leucocyte deoxyribonucleic acid photometry 620
Leucyl - β - naphthylamide and enzyme identity 609
Lipids, fixative action on 572

Lipids, OsO_4 reaction on 560
Liver, carcinogenesis: ribonuclease 161
glucose-6-phosphate, electronmicrography 635
lesions, $C^{14}Cl_4$ localization 613
phosphatases, sucrose preservation 487
phosphorylase, chick embryo 454
regeneration, colchicine, RNA synthesis 633
Living cell UV photometry 621
Locus coeruleus, histochemistry (animal) 617
Lysosomes cultured neural cells 202, 635
Golgi localization 630
Mn^{++} effect on brain 5-nucleotidase 455
Mast Cells
chymotrypsin by DFP-H^3 uptake 616
chymotrypsin, specific substrates 617
histamine demonstration 534
metachromatic stain of granules 165
Members of the Histochemical Society elected in 1960–1961 462
Menadione effect on tetrazole reductase 606
Metachromasia of mast cell granules 165
Metachromatic chondroitin compounds, Ca^{++} binding 673
fluorescence, acridine orange 22
Microradiography in calcification 30
Microspectrophotometry of arginine 477
Mitochondria, adenosine phosphatase 621, 625
culture cells, oxidases 605
injury in unfixed tissue 603
isocitric dehydrogenase 528
Molluscan chitin, reactions 87
Monoamine oxidase, locus coeruleus 617
Motor endplates, acetylcholinesterase 317
Mucopolysaccharides, aromatic diamine reaction 368, 612
flavobacterial enzymes 610
fluorescent antiserum 491
fluorescent deacetylchitin 612
Hale reaction variant 609
histochemical characteristics 612
Hurler type, localization 79
stains in cartilage 73
Muscle cell cholinesterase 66
Muscle, glycogen localization 38
Muscular dystrophy, histochemistry 132
Myoglobin localization 206
Naphthol AS phosphates and phosphatases 146
Naphthol AS-TR phosphate synthesis 93
Nerve, peripheral, cathepsin in 473
Neural tissue cultures, lysosomes 202, 635
Neutral red granules, lysosomes 202, 635
Noradrenaline, photometry of iodate reaction 59
Nucleic acids, differential precursor radioautography 586
in glia cells 619
5-Nucleotidase, anionic inhibition 631
in brain, Mn^{++} and pH effects 455
Oocytes, thymidine H^3 labeling 621
Oral mucosa, glycogen synthesis 690
Osmium reaction on lipids, etc. 560
Oxidative enzymes, culture fibroblasts 605
Formol calcium effect on 603
K^+ and Ca^{++} relations 602
see also specific enzymes
Pancreatic β cells, adenosinetriphosphatase 628
Perchloric acid method for cholesterol 615
Peroxidase in myoglobin 206
pH effect on brain 5-nucleotidase 455
Phosphatases, liver sucrose preservation 487
hepatic and Kupffer cells 392
acid in toad kidney 126
alkaline, developing tooth 117
in frozen sections 146
Phosphorylase, adrenal, assay of 622
chick embryo 386
chick embryo liver 454
Phosphorylase localization 585
in oral mucosa 690
in uterus, hormones 430
Phosphoryl chloride action on tissue 548
Photometry of leucocyte deoxyribonucleic acid 620
Plasmalogen in kidney of dehydrated toad 126
Polarization microscopy of bone 636
Polyacrylamide gel electrophoresis 542
Polyvinyl alcohol imbedding 634
Potassium and oxidase activity 602
Proceedings of the Histochemical Society 1961 595
Abbreviations used in 638
Index of authors and discussors 637
Protease, gelatin silver method 469
Proteins, acetylation-H^3 amine localization 598
acrolein Schiff reaction 234
distribution of injected tagged 356, 634
fluorochrome 356, 458, 614, 634
Pyelonephritis, experimental 632
Pyrophosphatase, mouse epididymis 418
Q_7, coenzyme in dehydrogenase systems 635
Radioautography, in calcification 30
$C^{14}Cl_4$ lesions 613
lactose in ileum 452
and mucopolysaccharide synthesis 278
with two emulsions 586
Radioautography, of water soluble reagents 597
of zinc 111
Raw frozen technics, mitochondrial damage 603
Reducing substances in locus coeruleus 617
Reductases, chromatographic purification 605
Reductases, menadione effect 606
Regeneration, liver, RNA synthesis, colchicine 633
Renal excretion and resorption of fluorescent proteins 614
Renal β-glucuronidase, androgen reactive 633

Renal P-1, P-2 tubules, functional difference 615
Renal proximal tubule, enzymes 578
Resorcin fuchsin elastin stain, mechanism 553
Retinal pigment epithelium, dopa reaction 457
Ribonuclease in liver carcinogenesis 161
Ribonucleic acid, cytophotometry 97
  stain, with azure A 619
  synthesis, liver regeneration 615
Rosindole method and tissue fibrin 340
Sakaguchi reaction for microphotometry 477
Salivary gland oxidase reactions 197
Salivary sialomucins 176, 400
Salt concentration, ribonucleic acid metachromasia 619
Schiff base reaction with azo coupling 600
Schiff base reactions of mucins 600, 612
Schultz test for steroids 2
Secondary amine Schiff bases at aldehyde sites 600
Section freeze substitution 292
Serum protein, injected, distribution 356, 634
Sialomucins in ox and rat salivary glands 176
Sialomucins, rodent vagina 400
Skin, cytochrome oxidase distribution 694
Sodium chloride in fixatives 409
Steroids, Schultz reaction 2
Substantivity of ditetrazoles 604
Substrates for aminopeptidase method 607
Succinic dehydrogenase, coenzymes 635
Succindehydrogenase in locust 157
Sulfhydryl-disulfide ratio by DDD 640
Sulforhodamine B thyrotropin tagging 271
Sympathetic ganglia, acetylcholinesterase 618
Testis, rat, β-glucuronidase 615
Tetracycline in bone tumors 261
Tetrazoles and substantivity 604
Thiamine pyrophosphatase, mouse epididymis 629
Thiolacetic esterase method 325
Thymidine H^3 fetal oocyte nuclear label 621
Thyrotrophin distribution 271
Toad kidney, dehydration, cytology 126
Toluidine blue and bone birefringence 636
Tooth development, enzymes 117
Transglucosidase in oral mucosa 690
Transpeptidase, γ-glutamyl, localization 624
Ultraviolet cell photometry 621
Uridine diphosphate glycogen synthesis 304
Uridyl transferase demonstration 623
Uterine phosphorylase, hormone effect 430
Vaginal sialomucins, rodent 400
Versene and TPN dehydrogenase 203
Water metabolism, toad renal cytology 126
Water soluble substances, radioautography 597
Zinc in bone tissue 141
$Zinc^{65}$ radioautography 111

The Editorial Office of the JOURNAL OF HISTOCHEMISTRY AND CYTOCHEMISTRY maintains a register of positions and personnel available in the field of histochemistry. Inquiries may be directed to Dr. J. B. Longley, Department of Anatomy, Georgetown Medical School, Washington, D. C. A fuller statement of the principles on which the register is operated appeared in the January, 1959 issue of the JOURNAL.
